

## 英文練習 comprehension-1(小三適用)

Name :	Marks : /16
--------	-------------

Read the following article and answer the questions. Circle the most appropriate answer. (2 marks each)

There are many colors in the rainbow. But these colors belong to different groups. Red, yellow, and blue are primary colors. You cannot make them out of other colors.

You can mix primary colors to make secondary colors, though. For example, you can mix red and yellow to make orange. Also, you can mix yellow and blue to make green. Finally, you can mix red and blue to make purple. Orange, green, and purple are all secondary colors.

If you mix primary and secondary colors together, you can make intermediate colors. Some intermediate colors are blue-green and red-orange.

1. What is the passage about?

A. rainbow      B. colors      C. red and yellow
